cove works

Cove recliner provides precise movement with its unique Trac-Rite casters, zero turn radius and central brake system. Cove's effortless, one-handed steering during transport allows nurses to remain focused on patient care.

Patient
Decades of proven dependability

Sleep
Designed for patient or overnight guest use

Orthopedic
Higher seat minimizes effort to stand or sit down

cove transfer arm

The Cove Transfer Arm is designed to make patient transfers safe, quick, and easy, protecting both staff and patients. Research with nurses and physical therapists resulted in the development of a convenient arm release lever located near the front of the chair. After positioning the chair next to the bed, nurses can simultaneously assist patients while lifting the chair arm. Cove's arm design is safer for the patient, and efficient for the staff.

cove recliner highlights

- Fully renewable upholstery and components
- Standard moisture barrier
- Wood, urethane or solid surface armcaps
- Straight back option available
- Feet available in wood or metal
- Base mold bumper reduces damage to fabric and walls
- Quick Release Seat option supports infection prevention efforts
- Quick-change mechanism for easy maintenance or replacement
- A variety of tables are offered in solid surface, thermoform or laminate
- Trendelenburg models available
- 27.5" extra wide models for both patient and orthopedic recliners
- Recessed arm panel limits damage to ottoman handle
- 25 year warranty, recliner mechanism 10 year warranty
- 500 lb. weight capacity
- GREENGUARD® Certified for low chemical emissions UL.COM/GG UL 2818*

COVE patient recliner

53W981
patient recliner, wide

- Zero turn radius and “trac-rite” caster system offer agility in tight spaces
- Choose from a modern, handsome straight back, or tulip-shaped back. The contour of the tulip back provides generous area for patient comfort, while maintaining a small footprint
- Ottoman handle and central caster brake are accessible for both the patient and staff
- Seat and back are designed to move together dynamically, to provide full ergonomic support at any position
- Recessed side panels create easy-to-grip armcaps to aid while raising from the reclined position
- Optional push bar and footrest allow for limited transport, reducing the number of patient transfers

COVE sleep recliner

- Pneumatic cylinder allows for user to easily select from an infinite number of recline positions
- Recline release lever is thoughtfully placed to be reachable by both the user and staff

COVE orthopedic recliner

53H981
orthopedic recliner

- 21" seat height minimizes effort to stand or sit
- Arm and back heights have been designed to maintain the relative distance from the seat to ensure the same comfort
- Optional footrest provides additional support

transfer arm option

- Arm motion allows chair to be positioned near bed prior to raising the arm, providing a quick and safe transfer
- Available on right, left or both sides
- When in the raised position, the arm is counterbalanced to remain open
- Transfer arm option only available with straight back style
